Upper East Side Historic District

Article From Wikipedia

The **Upper East Side Historic District** is a landmarked historic district on the Upper East Side of New York City's borough of Manhattan, first designated by the city in 1981. It was listed on the National Register of Historic Places in 1984. Its boundaries were expanded in 2010.

The district includes all of the Fifth Avenue properties bordering Central Park from 59th to 78th Street; both sides of Madison Avenue from 61st Street to 77th Street; both sides of Park Avenue from just below 62nd Street to 72nd Street; and portions of both sides of Lexington Avenue from 63rd Street to 75th Street.

The district is home to a number of buildings individually listed on the National Register.

National Register Historic Districts are defined geographical areas consisting of contributing and non-contributing properties. Some properties are added automatically to the National Register when they become administered by the National Park Service. These include National Historic Landmarks (NHL), National Historic Sites (NHS), National Historical Parks, National Military Parks, National Memorials, and some National Monuments.

A listing on the **National Register of Historic Places** is governmental acknowledgment of a historic district, site, building, or property. However, the Register is mostly "an honorary status with some federal financial incentives. The **National Register of Historic Places** automatically includes all National Historic Landmarks as well as all historic areas administered by the National Park Service.

Historic districts possess a concentration, association, or continuity of the other four types of properties. Objects, structures, buildings and sites in a historic district are united historically or aesthetically, either by choice or by the nature of their development.

Listing in the **National Register** does not restrict private property owners from the use of their property.
