

GIVE A LITTLE LC

With MillionTreesNYC this summer! Here are posts to use on Facebook and Twitter.

Please remember to tag
@milliontreesnyc in your post, too!

Root for our trees. Help them grow up big and strong by giving a little TreeLC and water this summer!

Is it watering weather? Check the forecast and spread a little TreeLC by watering trees in your neighborhood.

Give your neighbors some TreeLC this summer. The wooden, leafy ones. Trees need 15-20 gallons of water during hot summer weather.

GIVE A LITTLE LC

Information to use in your newsletter:

Summer is here, and the trees are thirsty! Give a Little 'TreeLC~ and water a tree in your neighborhood. Young trees (small enough that you can fit both of your hands completely around the trunk) need 15-20 gallons of water during hot, dry weather when the temperature is above 85 degrees Fahrenheit. Visit www.milliontreesnyc.org to learn more tree care tips and locate a young tree near you on the TreeLC map, and remember: every little bit of care helps!

And for all the tree heroes out there who are already planting flowers around your trees, enter the *My Tree NYC: Beautiful Tree Bed Contest* to earn awesome prizes! Visit facebook.com/milliontreesnyc to participate

**Water the
ways to care
for trees?**
