c) Landmarks Committee – David Helpern and Jane Parshall, Co-Chairs

LM-1 Item 1 Approval

LM-2 Item 2 Approval

LM-3 Item 3 Unanimous Approval

Item 1: 20 East 79th Street (Metropolitan Museum Historic District) - Application is to add a building sign to the frieze of the portico above the main entry door.

WHEREAS 20 East 79th Street is a French neo-classical style building designed by C.P. H. Gilbert and constructed in 1912.

WHEREAS 20 East 79th Street, formerly partially residential, is now completely occupied by the Skarstedt Gallery; the gallery formerly occupied the three lower floors, but has now taken the entire space;

WHEREAS a Certificate of Appropriateness is required since the frieze of the cornice is less than 12" in height — in this case, approximately 10";

WHEREAS the proposed signage would be 68.6” wide x 7” high x 1” deep and would be fastened to the limestone frieze with a silicone adhesive — the lettering would not penetrate or disturb the limestone behind it;

WHEREAS the signage would replace the smaller, more hidden signage that is currently on the exterior wall behind the entry columns.

WHEREAS the applicant is proposing a modest intervention that is contextual and appropriate within the historic district,

THEREFORE BE IT RESOLVED that this application is approved as presented.

Community Board 8 Manhattan approved this resolution by a vote of 37 in favor, 4 opposed, 1 abstention and 0 not voting for cause

Item 2: 38 East 75th Street (Upper East Side Historic District) – Robert A.M Stern Architects – A “no-style” row house designed by Thom & Wilson and constructed in 1881-82 and altered by John W. Ingle in 1926. Application is to demo the existing front and rear facades, as well as the upper floors, and construct a new five-story limestone façade with a sixth story mansard and setback bulkheads above.

WHEREAS, 38 East 75th Street, a non-contributing building in the Upper East Side Historic District, originally built in 1881, was stripped of its façade ornament in 1929; and

WHEREAS, applicant proposes to demolish the street façade (north-facing), garden façade, and some of the existing mass at the garden (south-facing); and

WHEREAS, by removing some existing floor structure and lowering floor to floor heights, a five-story townhouse become a six-story townhouse while only raising the parapet height by two feet; and

WHEREAS, a new rooftop bulkhead while ten feet higher than the existing parapet (and eight feet higher than the proposed parapet), is set back from the street line by about twenty-eight feet; and

WHEREAS, a new elevator bulkhead while twenty feet higher than the existing parapet (and eighteen feet higher than the proposed parapet), is set back from the property line by about forty-eight feet; and

WHEREAS, neither rooftop addition is visible from any vantage point along the public way; and

WHEREAS, the applicants have chosen a Neo-Classical vocabulary for the street façade (north-facing) and a similar, but more restrained vocabulary for the garden façade; and

WHEREAS, for the street façade the applicants have chosen to introduce a shallow faceted oriel extending three floors vertically, and nearly the entire width of the building, topped by a columnar balustrade with the fourth and fifth floors aligning with the building immediately to the west. The visible composition is completed by a sixth-floor mansard with projecting round headed windows; and

WHEREAS, the openings in the facade are similar in proportion and size to those found on other buildings nearby; and

WHEREAS, the materials proposed for the street facing façade are Indiana Limestone, semi-custom wood windows and doors, and copper roofing for the mansard; and

WHEREAS, the garden facade (south-facing) presents a largely brick and wood exterior, with a massing that steps back from the existing non-conforming rear yard, allowing more light into the center of the block; and

WHEREAS, although somewhat crowded largely on account of the additional floor, the design, materials, and proposed craftsmanship are both appropriate and a welcome addition to the Historic District; but

WHEREAS, the existing entry steps at the street facade, which descend to the garden level, project beyond the property line, as do existing garbage bins; and

WHEREAS, the applicant proposed to extend that intrusion into the Public Way by centering the steps and moving them to the north, creating planters to either side of the steps, and whose north face aligns with the building to the west; and

WHEREAS, the applicants propose a 4'-8" tall wrought-iron fence to enclose the planters with slender limestone pillars marking the entrance, with an out-swinging gate; and

WHEREAS, the Committee believes that this intrusion into the Public Way requires a Revocable Consent from the City, and an appearance before the Community Board Eight Transportation Committee; therefore, be it

RESOLVED, That Community Board Eight **approves** the proposed renovations and additions to **38 East 75th Street** with the **condition** that the applicant appear before the CB8M Transportation Committee and receive a ruling from the Full Board on the proposed front yard extension prior to an appearance before the Landmarks Preservation Commission.

WHEREAS 201 East 65th Street is an international style building constructed in 1951;

WHEREAS the canopy will be made of a water repellent fabric;

WHEREAS the fabric will have a sand color that is meant to replicate the color of the granite walls;

WHEREAS the canopy will have an L shape;

WHEREAS the portion of the canopy over the stair will run east-west, parallel to the sidewalk;

WHEREAS the portion of the canopy over the stair will have a downward slope;

WHEREAS the portion of the canopy over the stair will be 7'-0" wide by 10'-11" long;

WHEREAS the portion of the canopy over the stair will be 9'-9" wide by 17'-8" long;

WHEREAS each section of the canopy will have a gable shape with an overall height of 36 inches;

WHEREAS the gable will be 18 inches high, and the vertical sides will be 18 inches high;

WHEREAS there will be identification signs on the south and east faces of the canopy;

WHEREAS there will be a directory sign on the eastern face of the western leg of the arch;

WHEREAS the underside of the canopy will be lit, but only when the medical practice is open;

WHEREAS the overall shape of the proposed canopy is awkward and ungainly;

WHEREAS the proposed sand color is significantly different from the color of the granite walls;

WHEREAS the proposed canopy will block the view across the low stone wall and garden to the building;

WHEREAS the proposed canopy will be a visual intrusion into the garden setting for the building;

WHEREAS the proposed canopy is not in the spirit or character of the original design;

WHEREAS the proposed canopy appears to be a temporary solution and not integral to the overall composition of the building and garden;

WHEREAS the canopy is not appropriate and contextual with the modernist aesthetic of the building and site;

THEREFORE, this application is disapproved.
