#### historic conditions 10 East 82nd Street

Nos. 4-14.

Edward Kilpatrick, an architect-builder (see p.113), constructed six houses at Nos. 4-14 in 1888-89. Because of changes made to the houses in the 20th century to make them more fashionable, it is often difficult to recognize the original features of Kilpatrick's Queen Anne design. The facades of Nos. 10 and 12 have been completely altered, while No. 14 was replaced by a completely new building.

No. 10 is a four-story brick house above a high basement. As part of the remodeling Delehanty provided two basement entrances which are enhanced by neo-Federal enframements. The round-arched windows with keystones at the first story have a wrought-iron balcony supported on iron posts. This balcony also provides protection for the entrances. A wide band course above the first floor incorporates the neo-Federal motifs of rosettes and vertical grooving. At the upper floors, the keyed window enframements were removed to be replaced by rectangular lintels and sills. However, the original wood bead-and-reel window moldings were retained. The window sash is nine-over-nine. The original Queen Anne

cornice was removed and replaced by a lower dentiled one with pulvinated frieze set below a brick parapet.
